

HKTVMall Makes Use of eFulfillment System to Reduce Carbon Emission

Around 98% of vehicles in HKTVMall delivery fleet were compliant with Euro 5 or Euro 6 standards, or zero-emission vehicles. In addition, the Group uses the refrigerant type R-404A in our owned delivery fleets which is an ozone-friendly refrigerant.

Furthermore, the smart fulfilment system that HKTVMall is using plans the most efficient delivery route. The fleet will follow the planned route to ensure the delivery is completed under minimum energy consumption.
