

CLP @ReThink HK 2025 - Powering EVery Ride. All In For EVergreen.

HKTVmall introduced its first e-truck with 3 compartments at different temperatures in 2024 to reduce GHG emissions. This e-truck achieves zero emissions and cools 30% faster than traditional diesel trucks, allowing HKTVmall to grow its business while protecting the environment.

To promote the development of electric vehicles and electrification in the logistics industry, HKTVmall attended the opening ceremony of "CLP @ReThink HK 2025 - Powering EVery Ride. All In For EVergreen.", shared HKTV's efforts in driving sustainability and logistics transformation, and introduced the advantages of HKTVmall's e-truck, hoping to inspire the industry to embrace change together.
